SAS Viya Administration Checklist

> Please read the **Project README** if you have not done so already.

This checklist lists both initial tasks, and regular tasks. The regular tasks are then also presented in a task schedule, indicating at a glance a suggested frequency at which each regular task might be performed.

Alternatively, view the same tasks grouped by topic.

Initial Task Checklist

This table lists larger tasks. You should consider performing them once. You should revisit these tasks if major elements of SAS Viya change or your business requirements change. Tasks in this checklist do not need to be repeated on a regular scheduled basis.

> *45 tasks tagged as Initial;Done*

# ▲	Title	Description	Topic	Essential
0010	Automate your SAS Viya Deployment Process	Automate the process of creating and configuring your SAS Viya deployment	Kubernetes & IT Admin	-
0020	Install the SAS Viya CLI	Ensure you have installed the sas-viya cli and its plugins.	Kubernetes & IT Admin	-
0030	Develop an update plan	Develop an update plan: outline tasks required before, during and after an update	Kubernetes & IT Admin	Yes
0040	Maintain a Secure Password Database	Maintain a secure and encrypted password-protected password database using an appropriate software tool or service	Kubernetes & IT Admin	-

10: Validate your SAS Viya Deployment

Readiness service

Documentation

ValidateViya

Automation

Copyright © SAS Institute Inc. All rights reserved.

9: Define Process for Onboarding and Offboarding Users

Initial: choose provider
SCIM vs LDAP

Manage custom group memberships

Home directories

Training and orientation

Copyright © SAS Institute Inc. All rights reserved.

8: Authorization Model

Develop an authorization model

- Users and Groups
- Access to Content
- Access to Data

Maintain the Model

- Update
- Track changes
- Test

Consider automating updates to the model

- sas-viya CLI
